One side is a large, general map of the continent with photos and short descriptions of the various Antarctic explorers. The other side are closeup maps of the areas generally visited by Antarctic tourists, interspersed with photos of birds, mammals and landscapes of the area.1 of 1 people found the following review helpful. One of the best Antarctic maps!By Tokyo ClaudiaOne of the best Antarctic maps! I had bought this before my trip, and used it daily to help me see where we were, and also read about the history and men and women who had travelled and explored in these places. I realized how helpful this map was when I saw it being offered for sale in our cruise ship's gift shop.1 of 1 people found the following review helpful. Exceeded expectationsBy CustomerA great, detailed map. Very comprehensive with insets. The list of explorers and their short biographies helps to understand how Antarctica is controlled by treaty today. As it turns out, this is the only map that was sold onboard the ship that we sailed on.

This is an excellent foldout map of Antarctica. On one side there is a map of the Antarctic continent, around which succinct biographies of Antarctic explorers from William Spiers Bruce to Edward Wilson are shown. On the other side there are many fine colour photographs of seals, penguins and other Antarctic wildlife, together with an inset box summarising the Antarctic Treaty and other information on Antarctic waters, Cape Horn, Tierra del Fuego, the Beagle Channel, the Falkland Islands and South Georgia. It is aimed at visitors arriving by sea.
