ITM Canada : Antarctica 1:8M Travel and Reference Map (International Travel Maps) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Antarctica 1:8M Travel and Reference Map (International Travel Maps):

0 of 0 people found the following review helpful. My own interest is as a layperson with a love for reading Antarctic fiction and books on early exploration ...By M. BaileyI have an older version of this map which shows its heavy use. I bought this one for a nephew-in-law who is an Antarctica freak. My own interest is as a layperson with a love for reading Antarctic fiction and books on early exploration and for watching documentaries and following ongoing research being conducted there.0 of 0 people found the following review helpful. Disappointed. Although map is largeBy J. SkeltonDisappointed. Although map is large, many important landmarks and locations are not marked. Demaille Island, a major stop during most Antarctic cruises, is not marked. Even the Antarctic Circle is not shown on the map.I will be returning this map as it does not have the detail I expected.

Folded color map of Antarctica. Scale: 1:8,000,000. Map of the continent shows glaciers, islands, mountains, ice rises, other natural features and stations/settlements. Information about climate and natural features, flora and fauna of the land and surrounding seas and history. Includes inset map of Azimuthal Equal-Area Projection (scale 1:75,500,000).

About the AuthorITMB Publishing (International Travel Maps and Books) of Vancouver, Canada, prepares detailed reference and travel maps of countries, regions and cities around the world. ITMB has released more than 190 titles to date and is adding approximately 35 new titles each year. A cartographic pioneer whose titles include many that are unique or the first of their kind, the company produced the first commercially available travel map of the entire South American continent in 1985.
