**Peter Carey, Craig Franklin : Antarctica Cruising Guide** before purchasing it in order to gage whether or not it would be worth my time, and all praised Antarctica Cruising Guide:

13 of 13 people found the following review helpful. A must have, as the field guide, for your cruiseBy Cee SalbergThis book is for those that are getting ready or are just thinking about a cruise to Antarctica. However, this is NOT about selecting a cruise line. This is a field guide(with photos and maps) when cruising around the Antarctic Peninsula and South Shetland Islands. It includes:\* Landing Places\* Penguins and sea birds\* Whales and seals\*

Plants\* Geology and landscapes\* History\* Antarctic conservation  
Since most of the cruises from Chile or Argentina go to the places covered in this guide this is the books for you.9 of 10 people found the following review helpful.  
Good Introductory book  
By M. L. Bourque  
This book is quite interesting as an introduction to visiting Antarctica. The contents deals with the oceanography of the area surrounding the continent. Title could be misleading if one thought that the book was a guide to various "cruises" or cruise ships that go to Antarctica.3 of 23 people found the following review helpful. It's not what you think  
By Demeter  
I bought this book as a gift for a scientist who will be going to Antarctica next year. It was a mistake. It doesn't have the information I was expecting. In addition, this is not a full-sized book. It's only 5 inches by 7 inches. I don't want to ruin someone's livelihood so I will try to be fair. This book is not suitable for my purposes and might be right for a tourist to tuck into a suitcase.

For many people, an Antarctic cruise is the dream of a lifetime. This is the definitive field guide to Antarctica for visitors travelling by luxury liner, adventure cruise or private boat. The authors are recognised world experts in Antarctic travel, wildlife and conservation, and the book is illustrated throughout with outstanding colour photographs. Included are descriptions of the 26 most popular visitor sites on the Antarctic Peninsula, and the natural history of over 30 species of birds and mammals. Special attention is paid to explaining the threats to Antarctic conservation, including global warming, and there are tips on how visitors can minimise their own impact and help preserve this unique continent. Measuring 5 x 7 inches, this beautiful little book fits neatly into a parka pocket and is fully illustrated with over 200 colour photographs, and 7 maps.

About the Author  
Peter Carey is a zoologist who has made more than 60 trips to Antarctica working as a lecturer and expedition leader. He is director of the conservation organization SAFER (Subantarctic Foundation for Ecosystems Research). Craig Franklin is a zoology professor at the University of Queensland and has made more than 20 trips to Antarctica. He has published more than 100 scientific works, including articles in the academic journals Nature and Science.
