**Paul Simpson-Housley : Antarctica: Exploration, Perception and Metaphor** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Antarctica: Exploration, Perception and Metaphor:

A scene so wildly and awfully desolate...it cannot fail to impress me with gloomy thoughts" - so Scott perceived the stark Antarctic landscape in 1905. Antarctica traces images of the continent from early invented maps of Terra Australis Incognita up to Amundsen's arrival at 90 degrees South. Approaching Antarctica from sea and then land, the book analyses the differing perceptions of beauty and terror experienced by explorers, the stories they brought back and the power of new images refashioned at home.

`A rewarding book for those who wish to probe deeper than the recorded facts of historical record.' - Geography`... provides an attractive fresh perspective... the book is highly enjoyable. The quotations alone are stimulating and thought provoking, and there is the added benefit of an informed commentary.' - Progress in Human Geography

About the Author Paul Simpson-Housley is Associate Professor of Geography and Director of the Graduate Program in Geography at York University, Ontario, Canada.
