National Geographic Maps - Reference : Antarctica Satellite [Laminated] (National Geographic Reference Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Antarctica Satellite [Laminated] (National Geographic Reference Map):

0 of 0 people found the following review helpful. Five Stars By DJI like the overall visual of the map, the size and the detail. The quality is very good. 1 of 1 people found the following review helpful. Three Stars By Customer Would like more detail. Mine arrived folded and creased.

A striking view of Antarctica's terrain, compiled from 4,500 satellite scans. Additional inset maps show surface elevation, ice sheet thickness, velocity of ice flow, and sea ice movement and windflow. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:9,200,000 Sheet Size = 31.25" x 20.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
