National Geographic Maps - Reference : Antarctica Satellite [Tubed] (National Geographic Reference Map)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Antarctica Satellite [Tubed] (National Geographic Reference Map):

1 of 1 people found the following review helpful. FunBy Henry JonesVery fun map. Not much to say that you can't tell from the picture and dimensions provided. The paper was of adequate quality. I bought the tubed version, so, no folds or anything.

A striking view of Antarctica's terrain, compiled from 4,500 satellite scans. Additional inset maps show surface elevation, ice sheet thickness, velocity of ice flow, and sea ice movement and windflow.The map is packaged in a two inch diamater clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:9,200,000Sheet Size = 31.25" x 20.25"
