They have amazing pictures and so much information plus extra supplemental activities. Awesome books!4 of 6 people found the following review helpful. INSPIRERINGBy julieTHIS ARTIC TUNDRA BOOK, LIKE ALL THE BOOKS IN THE "ONE SMALL SQUARE" SERIES I'VE READ,IS VERY INFORMATIVE AND NICELY DONE...THE ILLUSTRATIONS ARE GREAT AND MAKE THE BOOK MORE THAN FUN...THIS BOOK ALSO, INSPIRES ONE TO LEARN MORE ABOUT THE PRECIOUS ANIMALS THAT SHARE THE PLANET ..IT INSTILLS RESPECT AND LOVE FOR NATURE...THIS IS A BEAUTIFUL SERIES OF BOOKS FOR KIDS..AND ADULTS CAN ENJOY AS WELL..THE "ONE SMALL SQUARE" SERIES IS AN EXCELLENT POSITIVE LEARNING TOOL..1 of 3 people found the following review helpful. A wonderful nature bookBy NotLimaHThis is a wonderful and very information nature book. We purchased it as required reading for our homeschool curriculum from Heart of Dakota. My soon-to-be 9 y/o son loves reading it and is very easily able to narrate back to me what was just read. His little brothers (64) love to look at the pictures and hear parts of the fact in this book. I would easily recommend this to anyone interested in the Tundra, particularly young children.

It's a land of riddles, where a winter night can last for weeks and where the ground is full of water though it rarely rains or snows. Bears, hares, wolves, and foxes roam the ice-crusting earth, as flowers follow the sun as it moves across the sky. Young readers may never come to the Arctic tundra, but now it can come to them in a book chock full of fun-to-do experiments and activities for children ages 6 and up that help them to solve some of the mysteries of this strange and forbidding world. Arctic Tundra includes a picture field guide, a glossary-index, and a resource list.

From the Back Cover: "These beautiful and scientifically accurate books capture your imagination with the excitement of observing nature and learning to interpret what you see."--Dr. Nancy B. Simmons, Assistant Curator, American Museum of Natural History. It's a land riddled with mysteries and puzzles. Where a winter night lasts three weeks. Where the ground is icy on the warmest of days. Where curtains of colored light hang in the winter sky, clinging to nothing at all. Beneath this magical heaven, bears and hares and howling wolves and hungry foxes roam the frozen earth, while ancient trees a century old strain to grow beyond a foot high. You may never visit this dangerously cold habitat. But now, with this activity-filled book, the strange and wonderful Arctic tundra is brrrrrrrought to you--one small square at a time. Arctic Tundra is just one of the exciting, vibrantly illustrated volumes in the critically acclaimed One Small Square series of science and nature books for children ages 6 - 9. Each book includes: Stunning full-color illustrations of each habitat and its creatures; Motivating experiments and activities, along with clear, diagrammed instructions and safety tips; A picture field guide to the habitat; A glossary-index and resource list. One Small Square--an eye-opening series--puts the whole world in perspective for children, one small square at a time. Each book is a thrilling, up-close encounter with mammals, insects, plants, birds, fish, amphibians, bacteria, and the ecosystems in which they live. "Science education at its best."--Science Books and Films. ABOUT THE AUTHOR AND ILLUSTRATOR: Donald M. Silver is the author of more than 40 science books for children and teachers alike. In addition to the award-winning One Small Square series, he has written The Animal World, Why Save the Rain Forest?, Extinction Is Forever, and The Dinosaur Activity Book--all illustrated by Patricia J. Wynne. Patricia J. Wynne's illustrations have also appeared in Scientific American, Natural History, and The New York Times as well as in the highly praised books Hungry, Hungry Sharks, and The Human Body. Both the author and illustrator live in New York City. ABOUT THE AUTHOR Donald M. Silver is the author of more than 40 science books for children and teachers alike.
