**Diana Bebek : California: A Visual Journey (America)** before purchasing it in order to gage whether or not it would be worth my time, and all praised California: A Visual Journey (America):

Attracting millions of people from around the world, California is known for sunshine, beaches, the glamour of Beverly Hills, the Golden Gate Bridge and the fun of Disneyland. There are many other sights to see: the cliffs surrounding Laguna Beach, the peak of Mount Shasta and the vineyards of the Napa Valley. With such an extraordinary variety of scenery and entertainment, California is America's most visited state. A Visual Journey series: The Visual Journey series are deluxe companions to the America series. These large, gorgeous hardcover gift books

are bigger, bolder and even more beautiful than the America books, featuring a larger trim size and with 192 pages of full-color photographs by acclaimed photographers. The photos, with their informative and entertaining captions, capture each state at its best. Outstanding views of panoramic landscapes, brilliant city skylines and picturesque communities make these new books great gifts for any occasion.
