National Geographic Maps - Reference : California [Laminated] (National Geographic Reference Map) before purchasing it in order to gage whether or not it would be worth my time, and all praised California [Laminated] (National Geographic Reference Map):

National Geographic's wall map of California offers a dramatic visualization of the Golden State's physical geography. From the Sonoran and Mohave deserts, the fertile Central Valley, the mighty Sierra Nevada Mountains, and the Redwood Empire, the entire state is rendered in elegant detail. Stunning shaded relief depicts mountains and ocean depths, while vibrant colorization distinguishes forests, deserts, valleys, and other physical topography. In addition to the geographical features such as mountain ranges, prominent peaks, islands, major lakes, rivers, and reservoirs, this map includes the location of cities, towns, airports, national and state parks, and military bases. The Pacific Crest Trail, a long-distance hiking and equestrian trail that runs through the entire state from the border with Mexico into

Oregon, is shown as well. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:1,185,500 Sheet Size = 33.5" x 40.5"
