Benchmark Atlases are the benchmark

from which all other road atlases are measured. My GPS nav system, as well as Google maps, will direct me to take dirt roads as part of a 'shortest route.' This is not an acceptable route on my Goldwing. These detailed maps clearly and precisely show the type of road from interstate to 4-wheel drive. It has helped me avoid bad routes numerous times. I also have one DeLorme Atlas (Nevada). The DeLorme has topography on the maps, but the lines are faint and tough to see and not detailed enough for real topo use. The Benchmark maps do not have topography, but they have a decent representation of elevation through coloring and shadowing. From cross-country travel to back-road use, I recommend Benchmark. 0 of 0 people found the following review helpful. Great Maps! By Robbie Benchmark is the standard for us after looking at the Rand McNally and deLorme maps. We travel a lot on back roads, and haven't found anything that compares to the accuracy of these maps. We have worn out several of these maps and repurchase them as needed. I wish the binding was better, and also wish they had more states. We love Benchmark maps!! 0 of 0 people found the following review helpful. Five Stars By Catherine Anne Smith Very detailed.

This oversized guide places its "recreation maps" of the state on left-hand pages facing diverse listings (with phone numbers)...An index to recreation resources is a state tour in itself. Then come the "Landscape Maps(tm)", so three-dimensional you feel every bump in the road as well as every foothill, mountain and fault; plus more listings and a complete and seemingly infallible index -- San Francisco Chronicle, January 3, 2000 "Landscape Maps", so three-dimensional you feel every bump in the road...more listings and a complete and seemingly infallible index. -- The San Francisco Chronicle, December 14, 1997 Landscape Maps featuring improved landform detail, the addition of hundreds of back roads...useful to anyone who drives the state. -- Bob Masullo, Sacramento Bee, March 31, 2002 The Landscape Maps are what set this publication apart. Legibility is excellent and the maps have a clean appearance. -- Kathy Rankin, Western Association of Map Librarians. March, 1998
