Actually many things that I learned about my hometown that I never knew. Great job Joey!0 of 0 people found the following review helpful. Not a true representation of all the wonderful people who made this a wonderful city thrive for ...By LodgaSeems to focus too much on the Katula, Galida and a couple other families. Not a true representation of all the wonderful people who made this a wonderful city thrive for as long as it has.0 of 0 people found the following review helpful. A great time of

historyBy LindsayBought this as a gift for my dad, he loves it. A few of the photos have family members in it so it's extra special for him.

Shaped from the rough farmlands and hills of northeast Ohio and forged from the blood, sweat, and tears of the steel mill workers, the city of Campbell (formerly Coitsville Township and later East Youngstown) had a humble start. With the turn of the 20th century, it was thrust into an economic growth that rivaled the biggest cities in the United States. Measuring only 3.74 square miles, some said Campbell brought in enough revenue that the streets could be lined with gold. The Youngstown Sheet Tube Company Campbell Works formed in 1900 and brought with it the need for more workers. As immigrants from the surrounding areas came for employment, their families joined them from Europe. Within a few years, Campbell became a culturally diverse city that fed on the revenue from the steel mill and its socioeconomic by-products.

About the AuthorJoseph Pavlansky has researched an extensive library of photographs from the Campbell Historical Society, as well as images from private collections, in order to create a path through Campbell's history. Images of America: Campbell takes a nostalgic and informative step back into the early days when mill smoke filled the sky of this culturally diverse melting pot of a city.
