National Geographic Maps - Reference : Canada Classic [Laminated] (National Geographic Reference Map)
before purchasing it in order to gauge whether or not it would be worth my time, and all praised Canada Classic [Laminated] (National Geographic Reference Map):

0 of 0 people found the following review helpful. Five Stars By Cynthia Thiel GREAT! Just what I have been looking for!
1 of 1 people found the following review helpful. Not flat By corlane Only one problem - the map can not lie flat. Weeks of pressing it down and multiple small areas still mound up everywhere between the weights holding the map as flat as I can get it. The laminate seems to be standard map laminate quality. The other thing I don't like is the size, but I can't complain since I knew the size when I ordered. I wish had a larger map of Canada.
2 of 2 people found the following review helpful. Nice enough I guess By Dave Nice enough I guess, but kind of small - it's funny, the accompanying map of the US is at least 3 times bigger (and very nice) despite the fact Canada is a far larger country!

National Geographic's map of Canada is one of the most authoritative maps of The Great White North. This Classic style wall map features a bright color palette with blue oceans and the country's terrain detailed in stunning shaded relief that has been a hallmark of National Geographic maps for over 75 years. Thousands of place names, accurate political boundaries, national parks, and major infrastructure networks such as roads, canals, ferry routes, and railroads are detailed. Coastal bathymetry is shown with depth curves and soundings, and the boundaries of the winter extent of sea ice are marked as well. Coverage also includes Iceland, Greenland, and portions of the United States. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:6,500,000 Sheet Size = 38" x 32"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
