National Geographic Maps - Reference : Canada Executive [Tubed] (National Geographic Reference Map)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Canada Executive [Tubed] (National Geographic Reference Map):

2 of 2 people found the following review helpful. Glaring error. By BARRY E BERCIER The map is beautiful and hangs on my wall...but only after I used white-out and black ink to undo the large print error in the Greenlandic name for Greenland. "Kalaallit Nunaat" is the proper name, but the map says "Kalaallit Numaat," putting an 'm' in the place of the "n." National Geographic assured me they would eventually get around to fixing the error...but not anytime too soon. They did not offer to replace my map with the correct one. 0 of 0 people found the following review helpful. The wall map looks very stately! By V Hanline We have placed this map on our wall to help our younger children learn geography better. It has helped to correctly identify places in Alaska as well -- which can be obscured on maps of the US in favor or more detail about the contiguous states. The colors are very pleasing as well and work well against our taupe walls. Very nice! 0 of 0 people found the following review helpful. Four Stars By Richard Fishwish I could have bought framed

The Executive political map of Canada is a striking example of the cartographic excellence National Geographic is known for. This map features an attractive antique-style color palette, stunning shaded relief, thousands of place names, accurate political boundaries, national parks, archeological sites, and major infrastructure networks such as roads, airports, canals, and railroads. In addition to Canada, coverage includes Iceland, Greenland, and the northern United States. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:6,468,000 Sheet Size = 38" x 32"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
