Great Map, Terrible Packaging!By CaymanTechThis map of the Caribbean is one of the best, and normally perfect for wall mounting. But, instead of shipping in a solid shipping cylinder, it was shipped in a flimsy and oversized rectangular box, which, with no body and virtually empty, arrived crushed. The rolled-up map inside was of course, flattened, with repeated creases across it's width, and no chance of it being presentable enough to mount on a wall. Have to go through the hassle of returning, ordering a new one, etc. And, I'm hoping that the replacement is shipped in the proper type of container -- a cylindrical cartridge of the type typically used to ship anything round and oversized (large calendars, maps, etc.).0 of 0 people found the following review helpful. Three StarsBy kristina blancoBeautiful map but came destroyed, should be send in a hard tub.

One of the most authoritative maps for the islands of the Caribbean Sea. It shows the entire region in great detail, with coverage extending from the tip of Florida to the northern extents of Colombia and Venezuela, east to Barbados, and west to the eastern edge of Honduras, Costa Rica, and Nicaragua. Detailed bathymetry reveals the remarkable seafloor variation of the Caribbean including the Puerto Rico Trench, the deepest point in the Atlantic Ocean at 8,605 meters (28,232 feet).Includes over 1,000 named places including country capitals, primary and secondary towns; political boundaries, important infrastructure, and all key landforms. Useful and informative notes about the region's history and unique geography are spread throughout the map, providing the reader further understanding of the Caribbean's unique attributes.The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:3,286,000Sheet Size = 36" x 24"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
