By Adrienne Strandberg I enjoyed reading this memoir about the author's trip to the Galapagos since I am planning a trip there. If you're going there, you'd probably enjoy it too. Otherwise I'm not sure it would mean much to you.

A journey of self-discovery unfolds as a woman travels with her adult daughters to the Galapagos to see natural selection in action. Her memoir of family bonding is set amongst giant tortoises, salt-crested marine iguanas, and crimson-throated Magnificent Frigatebirds; includes photographs and an essay on the life and work of Charles Darwin.
