Not useful for hiking specific trailsBy Homeschooling momI took a risk in buying these maps hoping to be able to use them for hiking some of the trails; I couldn't imagine how they could show topo details for each trail, but everyone wrote such great reviews I thought maybe the maps had blow-ups of trail areas. Not. These maps are completely useless for trail hiking. They were helpful to some extent to get an overall feel of the area, but each side has only one large area map with a scale of 1 inch = 1 mile, so you can't really get any useful topo map info for specific trails. I ended up printing out hike-specific topo maps from the web. They are a nice quality.1 of 1 people found the following review helpful. Really good for picking out trails for day hikes or even ...By Caleb OwenbyReally good for picking out trails for day hikes or even over nighters or multi day hikes. I use it to find public land to hunt for deer and turkey. Great combination if you pair these maps with Google Earth.0 of 0 people found the following review helpful. Great for trip planningBy Austin BsmithI use this regularly to map out hikes in these areas it has great features and I like that the trails are listed with the difficulty and length. I would recommend it.
