Chesapeake Bay supports more than 3,600 species of plants, fish and animals, including 348 species of fin fish and 173 species of shellfish. The familiar blue crab is one of thousands of species of animals inhabiting the diverse ecosystems found throughout the region. This beautifully illustrated guide highlights over 140 familiar and unique species of mammals, birds, reptiles, amphibians, fishes and butterflies/insects, seashore creatures, trees, shrubs and wildflowers. Also includes a regional map, information on the history of the region and how to protect and restore the bay habitats. It was developed in collaboration with the Chesapeake Bay Gateways Water Trails Network. A portion of the proceeds are returned to the Network to further its important activities. This lightweight, waterproof, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.
