Jackie Anderson, Jeet Atwal, Patrick Wiegand, Alberta Auringer Wood : Children Map the World: Selections from the Barbara Petchenik Children's World Map Competition before purchasing it in order to gage whether or not it would be worth my time, and all praised Children Map the World: Selections from the Barbara Petchenik Children's World Map Competition:

2 of 2 people found the following review helpful. The world seen by childrenBy Maija RacevskisThis is a magnificent book - a selection of maps submitted by children from around the world, aged 5 to 15, to the International Cartographic Association. Their dreams, interests, hopes and fears are interwoven into these poignant portrayals of our planet, its beauty, and its woes. Having been totally mesmerized by the copy I received, I immediately ordered five more, for each of my grandchildren, and for gifts. This is a book as much for adults as children, and my only regret is that it is a paperback. I will encourage the children to treat the book with love and care, because this is a keeper for life - mine, and my grandchildren's.

100 world maps drawn, painted, crayoned, sewn, and knitted by children over the past decade are featured in this retrospective survey of the work of young cartographers and symbologists. Many of the images are arresting and offer

a wide variety of perspective; younger children's maps are often accompanied by comforting images of childhood, such as teddy bears or birthday cakes, while older children tend to show images of poverty, disease, and warfare. Despite this scattering of painful images, the maps express the worldwide hopes of children for opportunity, economic development, friendship, and international understanding, and they have helped raise the standard for maps and atlases produced for children and young people. This is the first time the International Cartographic Association has ever allowed publication of these striking pieces of artwork.

About the Author Jackie Anderson is an associate professor of geography, planning and environment at Concordia University in Montreal and the Canadian chair of the Cartography and Children Commission of the International Cartographic Association. Jeet Atwal is a map specialist at the Maps, Data, and Government Information Centre at Carleton University Library in Ottawa, Ontario. Patrick Wiegand is a reader in geography education at the University of Leeds and the UK chair of the Cartography and Children Commission. Alberta Auringer Wood is a librarian specializing in maps, data, and media at the Queen Elizabeth II Library at Memorial University, Newfoundland.
