**Reise Knowhow : Chile 1:1,600,000 Travel Map, waterproof, GPS-compatible REISE** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Chile 1:1,600,000 Travel Map, waterproof, GPS-compatible REISE:

Chile 1:1,600,000 Travel Map, waterproof, GPS-compatible REISE, 2014 edition This map is waterproof and tear-resistant, highly suitable for Chile's climate. It is durable enough to survive time spent in the rucksack, pocket or on a restaurant table. The map is double-sided to provide the best balance between an excellent scale and a convenient sheet size (size 100 x 70 cm / 39.5 x 27.5 in) with topographic and tourist information. The map presents this unusually long country in four sections The two central panels also give good coverage of the Argentinian Andes, whilst the southern panel (southwards from approx. 46) extends to all the way to the Atlantic to cover southern Patagonia. Topography is shown by altitude colouring with graphics for salt flats, glaciers and names of mountain ranges, peaks, etc. National parks and other protected areas are highlighted. Road network distinguishes between paved and unsurfaced roads and includes selected tracks. Driving distances are shown on main and selected secondary roads and border crossings are marked. Railway lines are included, local airports are indicated and in the fjords between Puerto Montt and Puerto Natales, ferry routes are marked. Internal administrative boundaries are shown with names of the provinces. The map highlights towns, villages and natural features worth visiting. Symbols show various

places of interest, including campsites and selected mountain shelters, beaches and surfing sites, skiing and fishing areas, archaeological remains, thermal spas, etc. The map has a grid with latitude and longitude at intervals of 1 and an extensive index of localities with a separate list of national parks and protected areas. Multilingual legend includes English, high quality German cartography.
