**International Travel Maps and Books : Chile and Argentina Road Atlas Itmb** before purchasing it in order to gage whether or not it would be worth my time, and all praised Chile and Argentina Road Atlas Itmb:

4 of 4 people found the following review helpful. the worst I've ever seenBy bar\_end\_shiftDo not buy this map pamphlet. It is a disgrace.There are 2 primary problems with the booklet. First, it is not well organized. Second, it is inaccurate.On the first point, the Chilean portion and the Argentinean section are very difficult to integrate and cross reference. The two countries are mapped in separate sections and in different scales. OK, I can understand that such

organization might make sense given different information sources used to create the map, or simply the fact that the countries are shaped and sized differently. However, there is ZERO cross referencing in the map pages. You are looking at a given latitude in Chile and you want to cross to Argentina? sorry, there is no page reference. Really? In trying to rectify the above problem, I was paging through each Chilean map and writing the page number for the adjacent Argentinean map. But you know what? the information for the two countries is COMPLETELY different. The Chilean map would show a major highway crossing the Andes into Argentina at a given latitude, but then you turn to the Argentina map and there is NO HIGHWAY AT ALL for 500 kms! This degree of inconsistency happens every time you flip between the two countries, from the Atacama desert to Tierra del Fuego. I'm glad I discovered this while I still have a chance to re-order a different map before pedaling my bicycle across the phantom passes. Seriously, ITMB? You should be ashamed.

Travel atlas for the southern portion of South America. Includes coverage of Chile at the scale of 1:1,125,000, Argentina at 1:2,200,000, Tierra del Fuego at 1:750,000, and Easter Island at 1:38,000. Also includes detailed city center maps of Santiago de Chile and Buenos Aires.

About the Author This atlas combines four separate, though related, map areas within one volume. The latest ITMB travel atlas maps Chile at 1:1,250,000, Argentina at 1:2,200,000, Tierra del Fuego at 1:750,000, and Easter Island at 1:38,000. This is the perfect map for those touring Patagonia and the southern third of South America. It is, by far, the most accurate and up to date information in print, enhanced not only by the latest computer information, but by information learned as a result of ground-truthing by Jack and Lan last November, when they drove over 6,000kms in central Chile, Tierra del Fuego, and Patagonia. As with other ITM atlases, this one is the same shape and approximately the same thickness and weight. Detailed city center maps of Santiago de Chile and Buenos Aires are also included.
