Compass Chile : Chile Carretera Austral - Chilean Fjords 1:400,000 Regional Map, waterproof, GPS-compatible #7 before purchasing it in order to gage whether or not it would be worth my time, and all praised Chile Carretera Austral - Chilean Fjords 1:400,000 Regional Map, waterproof, GPS-compatible #7:

Chile Carretera Austral - Chilean Fjords 1:400,000 Regional Map, waterproof, GPS-compatible #7 no EAN 2014 This map is double-sided to provide the best balance between a good scale and a convenient sheet size (size 99 x 69 cm / 39" x 27"). It is waterproof and tear-resistant, durable enough to survive time spent in the rucksack, pocket or on a restaurant table. The map is a part of a 9-sheet series covering all of Chile at an exceptionally good scale. Coverage extends from just above 44 (north of Lago Verde and Puyuhuapi) to just beyond 4845' south and includes Pto Cisnes, Pto Ingeniero Ibez and, on the southern side, the northern part of the Campos del Hielo glaciers. The map also shows shipping routes within the fjords and locations of lighthouses. The map shows many more locations than general maps of the whole country. It provides a vivid picture of the terrain, using satellite imagery as a base, with shading and altitude colouring, plus plenty of names of mountain ranges, peaks, passes, salt flats, etc. National parks and other protected areas are prominently highlighted. Road network indicates dirt roads and tracks, as well as hard and soft

4WD roads, and shows locations of border crossings, petrol stations, toll booths and police units. Driving distances are marked on main and selected secondary routes. Railway lines are included and local airports/aerodromes are marked. A range of symbols indicate various places of interest and areas for recreational activities, including tourist information offices, UNESCO World Heritage and other cultural or historical sites, beaches, hot springs, trekking and skiing areas, etc. Each side of the map has its own index and a distance table. The map has a latitude and longitude grid at 15' intervals. The map is double-sided, with a small overlap between the sides and the adjoining titles. Map legend includes Spanish, English and German. Authentic, reliable Chilean cartography.
