Chile : Chile map before purchasing it in order to gage whether or not it would be worth my time, and all praised Chile map:

Chile 1:2,500,000 Santiago de Chile street plan COMPASS Double-sided, handy map locally produced in Chile presents Chile on one side and a street plan of central Santiago on reverse. The road map at 1:2,500,000 presents Chile on three panels, with an additional inset for Tierra del Fuego. The map has altitude colouring in bands of 1000m and with a choice of shades which in the southern half of the country hardly convey its mountainous topography. Main peaks are shown with heights and national parks or protected areas are marked. The map shows the network of main and secondary roads and south of Puerto Montt indicates shipping routes. Chile's regional zones are marked. Latitude and longitude lines are drawn at 1 intervals. With its scale, this map is suitable for basic orientation and reference. Approximately half of the reverse side is taken by a street plan of central Santiago, clearly highlighting locations of various places of interest and facilities, including metro stations, embassies, cultural institutions, etc. Also provided is a very basic road map showing principal transit routes across the city. Map legends are in English. Sheet size 73 x 69 cm / 29" x 27".
