Neville Shulman : Climbing the Equator, Running the Jungle: Adventures in the Jungles and Mountains of Ecuador before purchasing it in order to gage whether or not it would be worth my time, and all praised Climbing the

Equator, Running the Jungle: Adventures in the Jungles and Mountains of Ecuador:

0 of 0 people found the following review helpful. Very useful route descriptions
By mondialisme I liked this book a lot. I live in Ecuador for half a year now and am always looking for beautiful mountains to climb. Besides many interesting fact about Ecuador, this book contains very useful route descriptions for the highest mountains of Ecuador. Information that is not easy to find, especially if one is hiking without a guide, as I do.
0 of 1 people found the following review helpful. some information is not accurate
By felipe meneses The authors information or source about names, locations and facts is not always accurate therefore it should not be consider as a great information source. On the other hand is very pleasant to read...

Creatures from another time, volcanic mountains five million years old, Indian tribes surviving from the pre-Inca period, jungles and rainforests: Ecuador has all this and more. Only in its Galapagos Islands did Charles Darwin discover such a variety of extraordinary fauna that on his return to England he wrote his groundbreaking *On the Origin of Species*. With a philosophical yet humourous approach, Neville Shulman provides an in-depth background to Ecuador and its diverse peoples and tells intriguing stories of spectacular creatures and exotic flora, many not found anywhere else in the world.

About the Author Neville Shulman is the author of *Some Like it Cold* and *Zen Explorations in Remotest New Guinea*. He is a fellow of the Explorers Club and of the Royal Geographical Society.
