good map. I loved the material. it made it through the hike, getting wet, folded, and abused and not a single tear. I did get lost while using it, but I blame it more on inexperience than the actual map. Good product

I love these maps, and this particular one covers a large area with many wonderful trails. I was concerned with the large area it covered that the map would be too big or the writing too small, but it's just right.
