Collins Maps : Collins Handy Road Atlas Ireland before purchasing it in order to gauge whether or not it would be worth my time, and all praised Collins Handy Road Atlas Ireland:

The maps were not overly helpful. In fact, GPS was more effective than the maps, and the GPS in Ireland was iffy in rural areas (for instance, it put me on top of a cave system - literally - as opposed to the entrance, 3+ kilometers away). HOWEVER - the information section was extremely helpful (and easy to read AND broken down by geographical area) in describing places of interest and facilitated my choosing what to see what to skip this trip. SO, for that alone, the book is worth purchasing. 1 of 1 people found the following review helpful. Compact size, useful information By Kayla This map book is of a handy,

compact size which will make it easy to carry around in a small purse. I like how it has blown up segments for each part of the country, along with great walking maps for some of the cities (Dublin, Cork, Belfast, plus a couple of others). There is also a section with points of interest/descriptions/photos. Great for the price! 1 of 1 people found the following review helpful. Useful! By Dennis I purchased this as a backup to the GPS due to all the post that I read on how a GPS is not useful in Ireland. To the contrary to those post, I found the GPS very useful and did not have to reference the Map. That said, this does have some nice bits of information about the counties and some places to see. So for that, it still worked out nicely and was a good purchase.

Complete with information on places of tourist interest, this handy format route planning atlas in full color also features fully indexed town center plans of Belfast, Cork, Dublin, Galway, Limerick, and Londonderry. The whole of Ireland is mapped at 9 miles to 1 inch. The cartography is beautifully designed with color classified roads and subtle layered height tinting. Also included are a list of tourist information centers; descriptions of places of interest; a full index of place names and places of interest; information on airports, ferries, and radio stations; and a mileage chart."
