It is very comprehensive in that it shows a lot of information but it is still pretty easy to find the things you will likely be looking for, and it gives a good, clear overview of London. For minute to minute navigation, I used Google Maps on my phone (which is very good at telling you where tube stops are and

which trains to use and transfers to make), but I really liked this map for getting the big picture. 1 of 1 people found the following review helpful.
