Collins Maps : Collins Student Atlas before purchasing it in order to gauge whether or not it would be worth my time, and all praised Collins Student Atlas:

A fifth edition, extensively revised, updated, and extended Collins Student Atlas has been specifically designed for students aged 14-16, however its well-researched uncluttered design makes it suitable for all students. It features up-to-date reference and thematic mapping, mapping skills, country-by-country statistics, and a fully comprehensive index to all names appearing on reference maps. Thematic maps and accompanying graphs and tables cover topics such as tourism, telecommunications, environmental topics, and socio-economic topics. All maps have been fully updated

using the latest statistical information available. New features cover development indicators, pollution hotspots in the Mediterranean Sea, urban pollution in Italy, world agriculture, world urbanization, world climate change, low and middle economic developing countries, and ecological footprints. The inclusion of a selective list of web addresses on each thematic page ensures students are motivated to explore more deeply into a topic. High quality satellite imagery, which has been selectively used within special topic or study areas, supports data on the maps and is used to illustrate key environmental issues. Extensive lists of statistics for demographic and socio-economic facts provide up-to-date data for students wishing to create their own graphs to support individual geography, tourism, mathematics, economics, or IT projects.

'The 2015 Student Atlas is really staggeringly beautiful...I've been back to it again and again simply enjoying the contents and new configuration and presentation.' James Hourihane, Former Head of Geography Department, St Patrick's College of Dublin City University
About the Author
Collins Maps allow you to explore the world through accurate and up-to-date mapping created by Collins UK, a leading information-led publisher of illustrated and narrative nonfiction.
