Duncan It's no match for the National Geographic adventure map series, but this is a decent map of Colombia. At 1:1,400,000 it doesn't have a tremendous amount of detail, but it does show main roads. It clearly shows altitudes, and has several good city maps. Extensive index of towns, and recent 2012 publication date. This is about as good as it gets for a Colombia travel map. I love the international aspect of this order: a map of Colombia, printed in Canada, speedily shipped from Czech Republic, to the USA.
