It seems most Spanish language medical books are for hospital staff or have very basic First Responder info. This book goes beyond what my other 3 books have. The very first thing I saw that made me realize this was the type of book I was looking for was telling a person that you are about to put a C-collar on. This common practice was not to be found in my other books, but that is only the first thing I noticed. Everything I do as a fireman on-scene from asking medical problems to asking for information about a car involved in an accident are easily found and not mixed up with any law-enforcement info--just fire and medic related questions only. 1 of 1 people found the following review helpful.
