Tyler Burgess : Quito, Ecuador Townscape Walks before purchasing it in order to gage whether or not it would be worth my time, and all praised Quito, Ecuador Townscape Walks:

on this book, well, pamphlet really. Although I stayed in Quito for a month, and had a good sense of the geography there, I could not follow the scratchy, hand-written maps in this selection. What a disappointment! because I love the idea of the "townscape walk." Further, although the author DOES include helpful information about where to find the nearest clean bathroom, there is no historical or tourist information. If you are going to try to follow one of her tours, you would be well advised to bring along an additional tour book so that you have information about hours, fees, etc.

Step into the magic of Quito: ancient neighborhoods behind the tourist facade, an archeological dig, and lovely parks. Visit museums and churches en-route. Plus tips on the best cafes, where the best fresh fruit juice and yummy teas are served. Entirely hand drawn book filled with charming sketches by the author, who carefully designed each route as she walked and sketched. You really experience Quito on these walks!

About the Author Tyler Burgess, author and illustrator of five townscape walks books, takes you through the ins and outs of towns and cities. Each walk presents the urban scene as a dramatic event in the environment. Look for the line of life, why is this city here. Look for the grandiose vista, linking you, in the foreground, to the remote landscape. Experience the mystery of the emerging view, what is around the corner.
