Final Edition...By Bob F.The final edition printed from Rand McNally. By far it's the best geographical publication to date with detailed information on places across the United States.

This 2 volume set brings together the most current economic geographic information (in 2010). It combines maximum demographic coverage of the US with an authoritative interpretation of business data using maps, tables charts. Vol 1 has intro to the atlas, economic data, population data map sections. Vol 2 has statistics by state a state index that

includes references to maps in Vol 1.
