Very easy to readBy CatI was afraid it would be difficult to read due to it being fabric, but it is very easy to read.I didn't realize till I received it in the mail, but the map is double sided!0 of 0 people found the following review helpful. Always something newBy pgh girlWhen this arrived, I thought. "UH oh!--I didn't read the product description. It's cloth, not paper. But after awhile, I liked it better than paper maps. It's

much easier to handle than all those folds. The colors are vibrant and make it very easy to read. Best of all, no frustration trying to refold it back to its original form. Plus, it's the consistency of eyeglass cleaning cloths so you can clean your glasses with it as well. 0 of 1 people found the following review helpful. Fantastic By O-L-S This is the best eye glass cleaner ever. Really cleans without streaking and is large enough. I have not really had to use the map but get lots of curious looks and comments on how clever it is.

You will not want to put this waterproof map away The fabMAP puts its paper predecessors to shame. You'll never need to worry about getting the fold just right as this tear-proof, wrinkle-proof, microfiber waterproof map is virtually indestructible. Throw it in a pocket or a purse or keep it out to show off, the fabMAP lets you know where you need to go in a new, fun fashion. These easy-to-read maps highlight points of interest, restaurants, hotels, and more. The fabMAP also can double as a cloth to clean eyewear, cell phones or laptop screens when on the road.
