Rand McNally : Rand McNally fabMAP Santa Monica before purchasing it in order to gauge whether or not it would be worth my time, and all praised Rand McNally fabMAP Santa Monica:

1 of 1 people found the following review helpful. Misleading-map covers only a small section of Santa Monica
By joannab
This map is small and only shows the downtown area of Santa Monica. I expected a map of the entire city as it doesn't say otherwise and is advertised as a map of Santa Monica. One side is a map from the ocean ending at 9th Street on the east, California Ave on the north, and Ocean Park Blvd on the south. The other side is an even smaller area of the city showing a little more detail of the Third Street Promenade and Santa Monica Place. Very disappointing!

You will not want to put this waterproof map away
The fabMAP puts its paper predecessors to shame. You'll never need to worry about getting the fold just right as this tear-proof, wrinkle-proof, microfiber waterproof map is virtually indestructible. Throw it in a pocket or a purse or keep it out to show off, the fabMAP lets you know where you need to go in a new, fun fashion. These easy-to-read maps highlight points of interest, restaurants, hotels, and more. The fabMAP also can double as a cloth to clean eyewear, cell phones or laptop screens when on the road.
Check out the most fun and convenient way to carry a map of the Santa Monica area around. A waterproof map without the folding headache:
This napkin-sized fabric map fits easily into pockets, purses, suitcases and kids' hands
Tough - and soft Fabric Map:
This tear-proof, wrinkle-proof, waterproof map can stand up to the elements when you're on the road
A fabric map with more: This waterproof map will get you where you need to be, but it can also be used as a cleaning cloth or protective sleeve for electronics
Big type, big fun: Even though this fabric map is little, the roads and points of interest are easy-to-read
