Rand McNally and Company : Rand McNally Kids Illustrated Wall Map of the US before purchasing it in order to gage whether or not it would be worth my time, and all praised Rand McNally Kids Illustrated Wall Map of the US:

14 of 14 people found the following review helpful. Bigger than expected By M. Estes The product dimensions currently listed are incorrect. This map is 50" x 32". It's a lot bigger than I expected so I can't hang it where I originally intended. Nonetheless, it's a good map and my 2 1/2 year old son is going to love it. The booklet that it comes with provides facts about all of the icons on the map. I'm learning, too! As some of the other reviews have already stated, the laminate is next to nothing, so that is a concern. I couldn't imagine playing with it on the floor as is, but hanging it up should keep it in good condition. I plan to print out photos of us, the grandparents, and aunts and uncles to stick them on the map. Also, when daddy travels, we can move him around so he knows where daddy is. I bought the world map by the same brand, too. It's also 50" x 32" and they look great together. I just wish they were 1 sq ft smaller for my at-home purposes. They would be ideal for schools with more wall space. 1 of 1 people found the following review helpful. Pretty Map - Learning tool - Good for parents that travel a lot for visuals By Tee OI love this map! We bought the map to help my daughter learn her states as her Dad was a frequent flyer all over the US for work. It has little "icons" for each state like a peach for Georgia, Lincoln for Illinois...etc. Perfect for a preschooler. I bought it 2 years ago when she was almost 3. She has learned a lot about the United States gazing at it on her bedroom wall. It's really big and I had hoped to frame it. But it's been hanging for 2 years in her room with no issue. The laminate for it is hardly considered a laminate. It's just glossy. Hang it high and you'll have no worries about damage to it. Trying to buy 2 for her cousins in other states so that they can pinpoint where we live in comparison to them. 0 of 0 people found the following review helpful. Kid Friendly Map By Patricia Neill-lafauce I bought this for my 5 year old boys. The state names and symbols are big and easy to read. The variation of colors for each state makes it easy to see them from across the room. It comes with a guide that gives additional information that parents can teach their children. I was afraid it would be torn down after a week since there are no superheroes on it. I was so wrong. My boys love talking about what they see on the map, the places they've been, etc. While they stall for more time before lights out, a conversation about the map has replaced a drink of water, which is fine by me. A terrific map for kids.

The Children's USA Wall Map by Rand McNally is the perfect learning tool for kids of all ages. Each state includes picture images to help describe the important learning points of each state. For example the state of Florida will have a space shuttle near Port Canaveral and a orange for Central Florida. Map also includes major cities, state names and capitals. Map includes a durable 3mil lamination on both sides for years of use and dry-erase.
