This is a great map. We studied this area in homeschool this year. This map worked perfectly.5 of 5 people found the following review helpful. Good MapBy A. J. M.  
This is a pretty detailed map. I bought it to plan a vacation around the Fiji islands and it provided me a good overview of how the islands are located relative to neighboring islands. The map folds out nicely and everything is labeled clearly. Contrasts are good and islands are not too small.0 of 0 people found the following review helpful. great mapBy Robert Walker  
A great map for getting around this part of the world.It's big - the area - so the map by definition cannot be too small-scaled. But if you only want to carry one map - this is it.

A comprehensive Pacific map, including a main map and 52 inset maps of the major parts of the region. Principal cities, towns, and villages are shown along with roads, topography, and population figures where available. Time zones for the Pacific and individual countries are also included.
