**Dan Bailey : Ridges of England, Wales and Ireland: Scrambles, Rock Climbs and Winter Routes** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Ridges of England, Wales and Ireland: Scrambles, Rock Climbs and Winter Routes:

The Central Fells by Mark Richards covers 28 summits in the Central Fells of the English Lake District, including a

variety of ascents, old and new, in the high ground between Great Langdale and Keswick. The area is flanked to the west by Stake Pass, Langstrath, Borrowdale and Derwentwater and to the east by Grasmere, Dunmail Raise and Thirlmere. Author Mark Richards combines his passion for the Lake District and artistic flair with all the information the experienced walker needs to explore and enjoy the Mid-Western Fells. For each of the hills covered, this guide offers a dedicated chapter, with full descriptions of a range of new and old routes, full-color Harvey maps and clear elevation diagrams, detailed summit panoramas and lots of inspiring photographs. It is one of the first two to be published in Cicerone's 8-volume Lakeland Fellranger series, which provides a comprehensive new guide to the fells of the English Lake District, with a selection of new routes up more than 230 hills.

About the Author Dan Bailey has a consuming passion for the mountains of Scotland. A refugee from southern flatlands now based in Fife, he enjoys everything from winter mountaineering and rock climbing to hill walking and long-distance backpacking. This is his third title for Cicerone.
