great scenery. Hats off to the author! A few years ago, a group of my cycling buds and I decided that we needed to get away from the midwest winter here in Northwest Indiana/Chicago area by planning a cycling vacation in an area that was within a reasonable driving distance and featured decent weather (60+ degrees). I researched the areas that this book covers and we now make our annual trip in late March or early April to the North Central region of Georgia. The book contains biking routes in different towns and cities, so you can plan daily rides that allow you to bike only...no driving needed. Routes leave and return in the same town. A word of warning though...flat roads in the north central areas are hard to come by...foothills of the Appalachians! Whoo hoo! Make sure to visit Cartecay Bicycle shop in Ellijay, GA. Good people! They will take care of your bike and give advice for local rides. They also have weekend group rides. 0 of 0 people found the following review helpful. Perfect! By Jason B. Laird Great book for cycling. I was surprised at how good the information is presented. Maps, description's of the area, turn by turn directions and most important to my riding partner (and my old knees) elevation profiles. The book is physically small enough to carry with you on your rides. Lastly, my favorite part of the book is the fact that there is no unnecessary information. Just the facts Jack. If you plan on cycling in North Georgia, buy this book, you will not regret it.

Just a few short hours north of Atlanta, the Georgia mountains offer the best of all possible worlds for road bikers. A mild climate and nearly year-round cycling season, rolling blue ridges, tiny mountain towns and famous apple orchards all add up to a great cycling destination. Twenty-five of the regions best bike routes, ranging from 9 to 62 miles in length, are listed in this guide.
