Could not buy and bring home as it was too heavy, so pleased to see it was on , only to find that it is now sold at Costco (you may not want to print this though). Price was very good online so not bothered. Book is just amazing and six month old grandson - Brayden, just loves the photo. Giggles when he sees them. Also bought the Ocean book - same great quality. Amazing books.0 of 0 people found the following review helpful. A gift for my granddaughter that I'm trying hard not to keep for myselfBy CatherineLie it's companion, Ocean, this book is marvelous. The animals move through the pages like they might decide to step right out. There's such a treasure of information about each one that if you can turn your eyes away from the pictures, you'll find there's lots to learn. An amazing book.1 of 1 people found the following review helpful. Wonderful construction, beautiful intriguingBy R. ParisienThe coolest book you will ever see. Definitely a coffee table book that will wow everyone. It looks beautiful, antique like on the surface, very classy. Then whe you open it and see the optical illusion of the movement of the animals, it's so very cool. I saw this at someone's house just had to purchase one for myself. It also has very interesting facts about the animals on the page. I would recommend this to anyone. Don't let the price put you off, it's very well constructed.

A New York Times bestseller, *Safari* is a magical journey for the whole family. Readers, as if on African safari, encounter eight wild animals that come alive using never-before-seen Holographic technology. Each full-color image is like a 3-D movie on the page, delivering a rich, fluid, immersive visual experience. The result is breathtaking. The cheetah bounds. The gazelle leaps. The African elephant snaps its ears. The gorilla munches the leaves off a branch. It's mesmerizing, as visually immediate as a National Geographic or Animal Planet special. Accompanying the images is *Safari*, the guide: It begins with an evocative journal of a safari along the Mara River in Kenya and interweaves the history of safaris. Then for each animal there is a lively, informative essay and an at-a-glance list of important facts. It's the romance of being on safari and the thrill of seeing the animals in motion in a book unlike any other.

"Shots of cheetahs, rhinos, and gazelles spring to life as the pages turn." Entertainment Weekly An imaginative interpretation of the real thing. Audubon magazine "Holographic technology takes a big leap forward with this virtual safari." PW magazine AMAZING! The safari comes to life with each turn of the page. Jennifer Holland, bestselling author of *Unlikely Friendships*
