By Lucky L. I had hoped for a more topographic map so I was a little disappointed when I received it. I copied the name and specification of the same brand/area someone else had purchased and it was not the same. I like it as a way to reference back for photos and stories and did not use it to plan my safari. Good for my purpose  
3 of 3 people found the following review helpful. Safari  
By Lois J. Zuckerman Gives safari goers a chance to see where they are going, distances, places where their camps are located. i'd love it if it were plasticized a bit for extra strength as I've used many maps in paper that wear out so quickly  
1 of 1 people found the following review helpful. Very informative. Buy it.  
By Christopher M. Smith Very cool and informative map. Shows when and where to go to see specific animals. GREAT resource.

The only safari-planning map to Africa on the market, this essential travel tool includes key elements for planning a successful safari. A work of art in itself, this large-scale color map includes all of the top safari countries and important wildlife reserves in East and Southern Africa, the best times to go for wildlife viewing, info on what wildlife is best round where, temperature and rainfall charts, enlargements of the key regions visited by most travelers, a map of the Great Serengeti Migration and enlargements of other popular reserves, and the location of the best safari camps and lodges. Emphasizing wildlife areas over road systems, which are irrelevant to most safari-goers this map is by the author of Africa's Top Wildlife Countries and the African Safari Journal and Field Guide.

About the Author  
Acclaimed by Cond Nast Traveler, Travel and Leisure, and National Geographic Traveler as a top Africa specialist, Mark W. Nolting lives in Ft. Lauderdale, FL. Duncan Butchart lives in Nelspruit, South Africa.
